

Open position for Senior SW Designer/Specialist

Would you like to work in a growth company where things are done with the newest technologies? Do you believe the technology will bring better tomorrow and cooperation creates success?

We are seeking for the new talents to our Co-Heros team. You would be implementing the cloud apps for telco industry with state-of-the art tools and methods.

You might be our next team player if

- You have broad understanding of the latest technological achievements
- You have used one or more of these programming languages: JavaScript, Python, Go, C++ or other object-oriented languages
- You have experience from multiple SW development environments and tools e.g. Linux, AWS, Docker, Kubernetes, etc.
- You'll find it easy switching between different programming languages
- You are familiar with Agile or Kanban development processes

If you are finalizing your studies, we can offer you a job for master thesis execution.

Coheros is a Technology company offering SW consultancy and innovative IoT solutions. We provide customized IoT solutions to our customers by combining the HW and SW and presenting the analysed data at the cloud-based UI. Our first own IoT device is launched this year.

We offer you relaxing atmosphere in the modern working environment. You'll be working with the skilled colleagues in challenging but interesting projects. Find out more about us: coheros.com.

Apply already today! Let us know your skills and interests and send your application with your CV to: letsplay@coheros.com
